MAINTENANCE

GROUPE Gorgé

HALF CENTURY EXPERTISE
FOR INDUSTRY'S BENEFIT

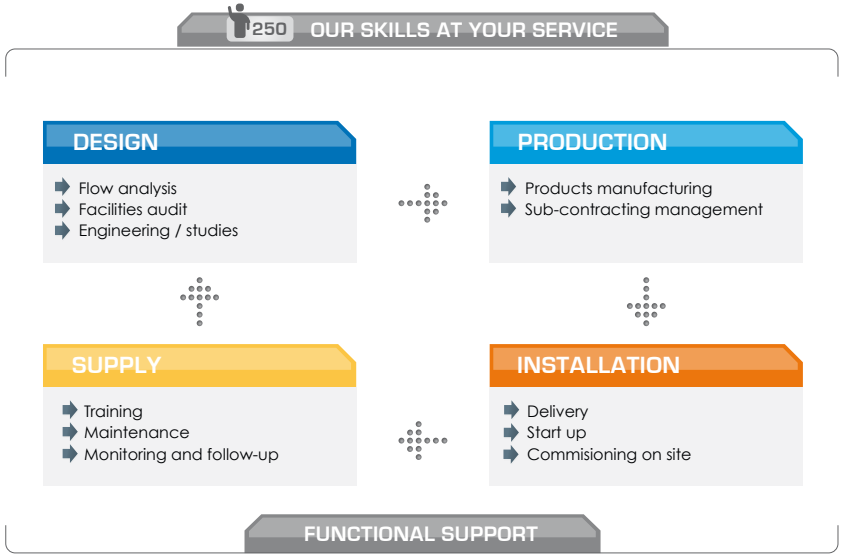
Since 1963, numerous major companies trust CIMLEC Industrie for:

- the efficiency of its personalized solutions
- its customer and quality oriented organisation
- and its ability of handling turnkey solutions.

- CIMLEC Industrie provides complete and efficient solutions that meet your specific requirements.

Besides, in order to ensure a high level service's quality:

- our staff get regular training, in order to constantly keep their technical skills up to date;
- our facilities (design studies, production units, test and simulation workshops) have been designed to answer your high requirements.



MEDIUM COMPANY FLEXIBILITY,
INDUSTRIAL FIRM STRENGTH

Thanks to our commercial organisation, we establish with each of our client a trustfull relation based on dialogue and proximity:

- Regional implantation with 4 business offices and 8 local workshops in France;
- European presence thanks to our subsidiarie Cimlec Industrial based in Romania;
- and the ability to handle projects throughout the world.

Cimlec Industrie belongs to Groupe Gorgé, an independent firm specialised in three areas of expertise :

Established in 1990 by group chairman Jean-Pierre Gorgé, Groupe Gorgé is listed on the French second market stockexchange.

- A turnover of nearly 224 million euros in 2014
- 1400 employees, 750 of which are specialist engineers and technicians
- A presence in 8 countries

MULTI PROCESSES
RECOGNIZED EXPERTISE

Our teams build on skills and expertises acquired during 50 years of experience in industry and apply them to design, manufacture and implement solutions for each sector of activity.

We work on ever more ambitious projects for more than 400 customers in various fields of activities.

AERONAUTICS
Familiar with the process specific to aircraft manufacturers, engine manufacturers or suppliers, our team of experts provides solutions for the flexibility and performance of your fabrications.

AUTOMOTIVE
Day to day proximity, rigourous project follow-up and endurance of implemented systems: these, give you the performance guarantee of our appraisals.

BUILDING & PUBLIC SECTORS
Aware of your appeal tenders procedures, we have the required certificates (Qualifelec E34, Qualibat 2411, 4412 & 4421) and a strong expertise for your buildings receiving public.

DEFENSE / NAVAL
Reliability of our facilities, teams expertise, ability to work in enclosed areas and secrecy management are your tomorrow's assets.

ENERGY / PETROCHEMICALS
Our very high level of performance, our constant focus on safety(work in ATEX area) and our quality management are the keys of success for our collaborations.

FOOD & BEVERAGE INDUSTRY
We propose dedicated solutions for food processing industries, in compliance with traceability, health and food hygiene and safety regulations.

NUCLEAR
Our rigour in traceability, in continuous monitoring of our teams' health and actions, has been recognized by our CEFRI and UTO certifications, and ensures our clients a high level of safety.

PHARMACEUTICALS & LIFE SCIENCES
We operate with discretion in your laboratories and take all the measures of hygiene and cleanliness to meet the applicable requirements.

TRANSPORT / LOGISTICS
From building to moving walks, we are experienced in all your processes and we put our necessary flexibility at your disposal.

WATER / WASTE MANAGEMENT
Experience of site work, waste management, efficient project reporting provide you the expected customer services.

AUTOMATION - ELECTRICAL ENGINEERING

A dedicated task force provides its expertise during all stages of your industrial project.
CIMLEC Industrie mobilises all the in-house resources required to automise your production lines and supply your equipments with energy.
We work with the biggest material manufacturers.

AUTOMATION

- Functional, organic and risk analyses,
  Maintenance and production handbook.
- Automation and supervisor programming,
  Programm simulation
- Software and supervisor setup
  Commissioning
  Draft of test procedures and execution layouts.
- Operators training for use and maintenance;
  Technical support to users;
  Optimisation and maintenance.

ELECTRICAL ENGINEERING

- Cabinets design and assembly
  Power & Temperature statement,
  Cable calculation.
- Switchboards, beams, cabinets, boxes and operator boards manufacture.
- High Voltage (HV)
  Low Voltage (LV)
- Compliance upgrades,
  Analysis of current leakage,
  Thermography, electromagnetic compatibility.

METAL WORKS & FRAMES

We put our know-how, our skills as well as an excellent reactivity at your service to realize and coordinate all your projects in steel works and frames, in all trades, since this is Cimlec Industrie's historic activity.

EXPERTISES

Mechanical studies, calculation, design of technical solutions for structures and frameworks.

Products manufacturing in our workshop, welding, painting and galvanization (steel / stainless steel / alu).

Fixing equipments safely.
Modification of existing fittings.

Delivery by a registered body.
Repair et handing over in conformity

APPLICATIONS

- Metal frames, steel structures
- Rolling beams
- Metal partitions
- Preparing of frontage
- Metal fittings
- Industrial boilers structures
- Footbridges, stairs, railings
- Platforms
- Metal gates
- Latticed protections

ROBOTICS

With nearly 15 000 robots equipped by CIMLEC Industrie, we have a perfect knowledge of both mechanical and control aspects of robotics projects.
As partner of main robots manufacturers (ABB, FANUC, KUKA, MOTOMAN…), we are able to design and deliver specific machines and automated cells fitting your needs.

EQUIPMENT	AUTOMATED CELLS	WELDING LANGUEPIN by CIMLEC INDUSTRIE
Electrical / mechanical assesments on robots, boards control and equipments.	- Feasability studies, - Industrial installations audit, - Integration study of welding / gluing / handling / packing systems...	- Consulting - Industrial installations audit - Specific machines audit
- Manufacture of electrical cabinets and dedicated beams (handling, welding, stamping, gluing…); - Manufacture of hydraulic equipments.	- Conceptual design and manufacture of automated cells, - Integration into industrial environment (conveyors, distributors / vending machine, specific machines...).	- Design and manufacture of welding machines - Carry-over
- Robot commissioning; - Robotic software setting up.	- Installation and test in shop, - Commissioning on site.	- Installation and test in shop, - Commissioning on site.
- Users training, - Maintenance and carry-over (improvement / evolution).	- Process training, - Reporting and documentation.	- Welding training, - Spare parts on Languepin welding machines

MAINTENANCE

Our experts assist their clients to manage and improve their global maintenance process.
From a single equipment to a complete production plant, we provide the most efficient solutions to fit your issues.

Thanks to our great experience of industry, we master your restraints and adapt our interventions: sensitive production environments, planned outage...

GLOBAL SERVICES

- Audit, diagnostics
- Consulting and maintenance engineering
- Implementation of your Computer Assisted Maintenance Management System (C.A.M.M.S.)

- Handle of your equipments in our workshops or directly on production site
- Preventative and/or remedial operations (level 1 to 5)

- Control and commissioning on site
- Equipments fleet management
- Dedicated experienced technicians on site

- Reporting schedule and follow-up indicators
- Analysis of your C.A.M.M.S. data
- Search for the best global possession cost

DEDICATED SOLUTIONS

- Corrective services or preventative maintenance contracts
- Guarantee of means or commitment on results
- Used and spare parts management
- Technical assistance to users, hotline, 24/7 support
- Night and/or week-end servicing

EXPERTISES

We plan and operate your maintenance for each of our expertises.

- Electrical engineering,
- Electrotechnical,
- Automation,
- Data processing,
- Robotics carry over,
- Mechanical engineering,
- Pneumatic equipments,
- Hydraulic equipments,
- Iron works,
- Specific machines...
